

Assessment Tools used:

1. Direct Assessment Tools

- Assignment-Each and every student is assigned with course related tasks during every course work once or twice and assessment will be done based on their performance. Marks are assigned depending on their innovation in solving/deriving the problems.
- Sessional-This type of performance assessment is carried out during the examination sessions which are held thrice a semester. Best two sessionals are picked for internal marks evaluation. Each and every sessional is focused in attaining the course outcomes.
- Semester End Examination-Semester End examination is a metric for assessing whether all the POs are attained or not. Examination is more focused on attainment of course outcomes and program outcomes using a descriptive and subjective exam.

2. Indirect Assessment Tools

- General Fitness Marks Evaluation- At the end of every academic year participation report is developed where the statistics of students who have participated in sports/ NSS/ NCC/ professional bodies/ student chapters/ workshops/ seminars/ conferences/ paper presentations/ internships/ industry visit etc. is prepared. This statement is considered to indirectly assess the POs.
- Survey reports- Indirect assessment strategies may be easily implemented by embedding them in the course-embedded survey form, graduate survey, Alumni Survey and Employer Survey.

Course-embedded Survey: during the program

Graduate Survey: after completion of graduation

Alumni Survey: after one year of graduation

Employer Survey: after one year of graduation
