ACTIVITY REPORT

EVENT NAME: ROLL N PLAY

SOCIETY NAME: GNDEC DATA SCIENCE CLUB

Type of Event: Gamified interactive challenges

Date: 30th October 2025

Time: 10:30 AM onwards

Venue: Lipton Ground, GNDEC

Organized by: Data Science Club, GNDEC

BRIEF DETAILS OF EVENT:

Event Overview: Roll N Play was a fun, engaging, and interactive event organized by the Data Science Club of GNDEC as part of the **APEX Fair 2025**. Designed to blend learning with excitement, the event revolved around a dice-based challenge format — where every roll unlocked a unique game. Participants got the chance to test their problem-solving, analytical, and technical thinking skills through a mix of tech quizzes, puzzles, and quick-response games, all inspired by concepts from Artificial Intelligence, Machine Learning, and Data Science.

Event Highlights:

1) **Quiz Pitch:**
   Participants were presented with multiple-choice questions related to Data Science concepts. Instead of answering verbally, they had to toss a ball into one of three boxes labelled **A**, **B**, and **C**, representing the possible answers. A correct throw earned them

points and allowed them to advance to the next level, combining both knowledge and coordination in a unique, gamified way.

2) **Guess the Logo:**
   Players were shown a series of logos representing global technology companies, software tools, and open-source platforms. Each participant had to identify the correct brand or tool name quickly.
3) **Tic Tac Toe:**
   This game added a data-driven twist to the classic game of Tic Tac Toe. Two participants competed against each other on a large game grid. However, before marking their **X** or **O**, each player first had to answer a question related to Machine Learning, Artificial Intelligence, or Data Science**.** Only if they answered correctly were they allowed to make their move on the grid.
4) **Feature Frenzy:**
   Participants demonstrated their data intuition by selecting the most relevant features from a mock dataset before time ran out — testing their grasp of real-world data preprocessing.
5) **Decode the Emojis:**
   A fun and creative round where players cracked the hidden tech or AI terms behind a string of emojis, combining logic with humour and quick thinking.

Highlights:

- **Number of Participants:**115
- **Level of Difficulty:** Moderate to High
- **Learning Outcome:** Enhanced awareness of core tech concepts, Data Science, and AI concepts
- **Prizes:** Winners of each game were rewarded with attractive **stickers** as tokens of appreciation for their participation and performance.
