# Department of Computer Science & Engineering

Process of defining Program Educational Objectives (PEOs)

The department established PEOs through a consultative process involving the stakeholders of the department, the future scope of the department, and the societal requirements. In establishing the PEOs following steps are followed:

Step 1	PEOs of the program are framed based on Institutional Vision and Mission, Departmental Vision and Mission, along with the views from the stakeholders and professional bodies.
Step 2	Programme Coordinator consults the key constituents and collects their views and submits the views to Programme Assessment Committee.
Step 3	Programme Assessment Committee summarizes the collected views and frame PEOs and forward the same to Board of Studies (BoS).
Step 4	BoS validates the PEOs and same is sent to Academic Council for approval.
Step 5	Academic Council approves the PEOs which are then published.
