GOB GEEKLORDS

A technical event was conducted based on coding.

Date:	27/02/2020	Venue:	G-15 and SL-I(MBA Block)
Time:	2:30 P.M Onwards	Total Attendance:	44

A event ”Gob Geeklords”, was organized on 27.02.2020. There were two rounds in the event. The motive of the event was to test the coding ability and coding compatibility of students.

In the first round a online quiz was conducted on the mobiles. After the first round top 13 students were selected for the second round which was based on coding.

First round was a quiz round that consisted of questions related to computers and coding.It was an online quiz that was organiser paced and consisted of total 20 questions.

The participants were given 30 seconds for each question to solve. Top 13 students were selected for the second round. In the socond round the participants were given with 10 coding question on an online platform. Out of 10 question they had to solve maximum of them in 30 minutes. On the basis of that the final result was compiled.

➢ Program Outcomes (PO)

1. **Engineering knowledge**: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
2. **Problem analysis**: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
3. **Design/development of solutions**: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
4. **Conduct investigations of complex problems**: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5. **Modern tool usage**: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
6. **The engineer and society**: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7. **Environment and sustainability**: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
8. **Ethics**: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9. **Individual and team work**: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

10. **Communication**: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
11. **Project management and finance**: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
12. **Life-long learning**: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

➢ Program Specific Outcomes (PSO)

PSO1: Graduate will be able to apply theoretical and practical knowledge of computer science for developing software solutions to the real time problems.

PSO2: Graduate will be able to apply and demonstrate the acquired knowledge of emerging trends and contemporary technologies in the field of computer science and engineering.

➢ Impact

Computer Society of India organized an event named 'GOB GEEKLORDS'. Here students get the chance to understand about their coding abilities. In this event there were two rounds of coding.

Through this event they got an opportunity to test their coding skills and if they are lacking somewhere to improve it.
