## **Industry Details**

Nebero Systems, Mohali

Founded in 2005, Nebero Systems has quickly become one of the industry leading software product development companies in the industry. Concentrating on providing each one of our customers with both reliable and secure, world-class products and solutions, we are the premiere service provider for all enterprise network gateway security systems that operate with open source technologies. Operating in almost every industry imaginable, our customers are continually provided with direct support that is accessible 24-hours a day, 7-days a week. Headquartered in India, with partners all across the globe, we are able to reach and cater to diverse client requirements throughout India, US, UK, Europe, Africa, South Asia and the Middle East. In fact, the direct support that we offer around the clock is one of the biggest advantages that we provide when compared to our competitors. Additionally, another one of the biggest advantages to using Nebero is our unlimited user license guarantee. Unlike our competitors, after becoming a client of ours, you will be presented with a lifetime user plan. With no hidden costs or additional requirements, all of our clients are continually allowed to use their license over the entire product lifetime.

Faculty Members - Dr Daljeet Singh and Prof Palak Sood

## **Visit Description**

An industrial visit to Nebero, a renowned IT company in Mohali specializing in Unified Threat Management (UTM) solutions, was organized for 3rd-year BTech CSE students. The visit aimed to expose students to real-world IT security challenges and the technologies employed to counter cyber threats. Nebero, a leader in network security, provided an in-depth understanding of UTM, which integrates multiple security features like firewall, antivirus, and intrusion detection into a single system.

Students observed how Nebero's innovative solutions safeguard enterprises from a wide range of cyber threats. The technical experts at Nebero walked the students through the company's infrastructure, showcasing how they manage data security,

handle network traffic, and ensure high-end protection against cyber-attacks. Students gained practical insights into cybersecurity protocols, threat detection, and mitigation processes. The interaction with professionals helped them understand industry expectations and the latest trends in cybersecurity. This industrial visit was an enriching experience for the students, bridging the gap between theoretical knowledge and practical implementation, and igniting interest in cybersecurity and network management as potential career paths.
