

Report on Industrial Visit to Sensation Software Solutions Pvt. Ltd.

Date of Visit: September 18, 2025

Venue: Sensation Software Solutions Pvt. Ltd., Mohali, Punjab

Organized by: Department of Computer Science and Engineering, Guru Nanak Dev Engineering College, Gill Park, Ludhiana

About the Company:

Sensation Solutions is a leading IT and Digital Services company offering customer-centric B2B and B2C solutions across diverse industries including Digital Services, IT, Gaming, Travel, Business Consultancy, and Legal Services. With a highly skilled team, the company is committed to delivering innovative and result-oriented solutions. Its exponential growth is driven by efficient processes, strong client interaction, and effective development strategies. Sensation Solutions stands among top market leaders, recognized for providing world-class IT and digital solutions that empower businesses to grow globally.

Details of the Visit:

On September 18, 2025, the Department of Computer Science & Engineering at Guru Nanak Dev Engineering College organized an industrial visit. Around 52 students from the Computer Science and Engineering dept. participated in this industry-academia initiative. The visit commenced at 8:30 A.M. as we boarded the college bus along with our faculty coordinators, Dr. Preet Kamal Singh and Prof. Kajal Chugh. Upon arrival at Sensation Software Solutions Pvt. Ltd., we were warmly welcomed and guided into an orientation session. This session introduced us to the company's structure, work culture, and service domains.

After the orientation, students participated in a skill assessment test organized by the company. The test aimed to evaluate their technical knowledge and identify potential candidates for training opportunities. Following this, a technical session was conducted on MERN stack development, which also included valuable insights into Java and other web development technologies. The session concluded with an interactive Q&A, where students actively clarified doubts and exchanged ideas with the experts.

The visit ended with the announcement of test results. Selected students were offered free training programs, while others were provided discounted training based on their performance.

Conclusion:

The industrial visit to Sensation Software Solutions Pvt. Ltd. was a highly enriching and career-focused experience. It offered valuable exposure to modern industry practices and emerging technologies, while also allowing students to assess and enhance their technical abilities. We extend our heartfelt gratitude to the Sensation Software Solutions team and our college for organizing such a beneficial and insightful learning opportunity.

Glimpses of the Visit:
