GURU NANAK DEV ENGINEERING COLLEGE,

LUDHIANA (16pt. bold)

The following is suggested format for arranging the project report matter into various chapters:

INDEX

1. Introduction

   This chapter must describe the detailed introduction about your project.

   Also include and elaborate the Objective(s) of the project (Same as in synopsis after revision if any)

2. System Requirements

   Specify the Software and Hardware requirements in this section.

3. Software Requirement Analysis

   Define the problem and define the modules and their functionalities

5. Software Design

   The detailed design of the project must be included in this section. This section is of utmost importance in this presentation. It must include the solution to all the objectives listed in synopsis presentation. Use appropriate design diagrams to give various solution. Following is the list of example design diagrams.

   - Flow charts or Block Diagrams

   - UML diagrams

   - DFDs

   - Sequence Diagrams

   - Use case

   - Activity Diagrams

   - State Diagrams

   - Communication Diagrams

   - Deployment Diagrams

   - Database Design

     o E-R Diagram

6. Testing Module

   In this section provide the proposal of the testing techniques to be used to test the system. Also provide the list of relevant test cases on which the system will be tested.

7. Performance of the project Developed **(so far)**

8. Output Screens

    Should include all user interfaces and output screens.

9. References

   Note: The mid-term report should be spiral bound with white cover page. The number of pages in mid-term report must be at least 35 and design part should be elaborated.
